

INNOKAM.PRO

NATIONWIDE SUBCONTRACTING PORTAL
INNOKAM.PRO

We reduce the distance between a customer and a manufacturer

innokam.pro

Why we have created innokam.pro - the Nationwide Subcontracting Portal

- ▶ innokam.pro has been created to implement the item 41 of the 'roadmap' approved by Dmitry Medvedev, the Chairman of the Russian Federation Government, with his instruction No.1257-r, as of June, 17, 2016.

The main task and targets of the innokam.pro

The main task is to unite manufacturers of goods and suppliers of services on the online basis in order to develop co-operation between them and create innovative products.

The main targets are:

- ▶ To make orders for advanced technology products and services accessible and get them from different Russian regions and other countries. This will let suppliers load their available capacity.
- ▶ To unite Research and Development, engineering, product lab test and certification activities of international and Russian companies.
- ▶ To arrange joint purchase of products, goods and services. This will let customers get extra privileges from suppliers.
- ▶ To use extra opportunities for promotion of products and services on the international and Russian markets.
- ▶ To exclude intermediate dealers and provide direct approach between a customer and a supplier. Only verified and trusted manufacturer can become a Participant of the Portal. You can sign up for the Portal only after you are recommended by a public authority of business support structures.

Main targets of the Portal

The Nationwide

Subcontracting Portal

[How to place your Orders](#)

[How to become a Participant](#)

Order

Cooperation and
joint procurement

Products and
services

Types of users

Participant

- ▶ A company which produces goods or services in the field of machine-building industry, IT, petrochemistry and polymeric production.
- ▶ A company which provides related services to the Participants of the Portal: Research and Development, engineering, testing laboratory, certification and others.

Customer

- ▶ An organization which needs to select a supplier to produce an advanced technology product.
- ▶ 'Order placement' service is free of charge for the 'Customer' category of users.

Privileged users

Industrial enterprises

- ▶ As required by governments either of the Russian Federation regions and other countries, municipal unities or business support institutions, they can use the Portal **for free up to 2 months.**

High schools, engineering centres, testing labs and certification agencies

- ▶ They can use the Portal **for free up to 6 months.**

Target No.1 'Order placement' (selection of suppliers)

Order
placement

- ▶ This feature is available and free of charge for all signed-up users of the Portal.
- 'Order placement' includes filling in an application/order for selection of a supplier to produce an advanced technology product.

Supported by KAMAZ , PTC

Description

Model and drawing of the case is attached.

1-st batch is 1000 cases. It is a new item, we are going to buy incrementally. Our plan is at least 10000 per year.

Reply content (first stage):

- 1) Casting price (rough)
- 2) Die price (rough)
- 3) Production engineers requirements
 - 3.1) Minimum (recommended) case thickness
 - 3.2) Minimum (recommended) edges thickness
 - 3.3) Edges tilt angle
 - 3.4) Any other proposals of production engineers to simplify and reduce the cost.

► Inside the order there is a detailed information available (drawings, technical documentation, description), as well as an option "Request contact details"

Display of orders on the user's account

The screenshot displays a user account interface. On the left is a vertical sidebar with navigation options: 'Orderplacement' (highlighted with a blue border), 'Profile', 'Products and services', 'Announcements', 'Orders for members' (highlighted in blue with a '3' icon), 'Account settings', and 'Exit'. The main content area is titled 'Your response to the orders' and contains a table of three orders. Each order row includes an icon, the order name, placement and request dates, the status, and a 'Change status' button.

Your response to the orders		Status
	<u>Springs production</u> Placed on 10.01.2017 Date of request: 18.01.2017	In process Change status
	<u>Fiberglass products manufacturing</u> Placed on 13.01.2017 Date of request: 18.01.2017	Status In process Change status
	<u>Aluminum die-casting</u> Placed on 16.01.2017 Date of request: 18.01.2017	Status In process Change status

Order execution control

- 1 In process – by a click
- 2 Contact the customer – 3 days period
- 3 A Confidentiality agreement has been signed – 15 days period
- 4 A commercial quotation has been sent – 7 days
- 5 A supply agreement has been signed – 30 days
- 6 First delivery has been performed – 60 days
- 7 Refusal – by a click

- ▶ The Portal provides an automatic order execution support system. This system allows automatic time-controlling of order execution stages. Also, the system will automatically remind the executor of the target date approach for the next order execution stage. In case of delay, the system informs the Portal Admin of the situation to solve it.

Target No. 2

'Cooperation and joint procurements'

Cooperation and
joint procurements

In this section signed-up users with the 'Participant' status can place information on co-operation of three types:

- ▶ Implementation of a joint project
- ▶ Co-operative order execution
- ▶ Joint purchase (procurements) of raw materials and parts

Cooperation

Place an announcement
- on co-operation
- on joint procurement

Description

SOOSAN SCS 736L-II TOP manipulator crane features, 4320-6952-74Г38 chassis features Country of origin South Korea. Engine: ЯМ3-53602-10
 Lifting capacity 7000 kg on min radius of 1 m. Model КП ZF-9S1310T0, 9 st.
 Lifting capacity 1 250 kg on max radius of 18.8 m. Chassis lifting capacity: 12.5 t. Load moment 15 t/m, wheel arrangement 6*6.
 Max work radius 18,8 m, power 312 h. p.
 Type of rig/number of sections 6/6 tank 300+210 l.
 Max hoisting height 20.8 m. Sleeping accommodation, inter-wheel and inter-axle lock. Outrigger (rest pad)/radius. Hydraulic, extension type/5.35 m.
 Weight of manipulator 3 572 kg. Euro-4 ecological standard.

- ▶ An example of the product information displayed.
- ▶ This section includes information on the name of the company, product description and 'Contact the company' option
- ▶ 'Contact the company' option allows to receive automatic messages about the visitors interested in the product of the user, and create statistics of how many times goods or services have been viewed .
